- The Underlying Sub-Fund invests primarily (at least 70% of its net asset value) in a broad selection of equity securities or equity-related securities issued by real estate investment trusts or companies that own, develop or manage real property from around the world (including initially the EEA, the UK, Russia, Switzerland, United States, and the Asian region) and which are listed, traded or dealt in on regulated markets worldwide.

Parties Involved	
<p>WHO ARE YOU INVESTING WITH?</p> <ul style="list-style-type: none"> • The Sub-Fund is a sub-fund of the Singapore constituted umbrella fund First Sentier Investors Global Growth Funds (the “Scheme”). • The Manager of the Sub-Fund is First Sentier Investors (Singapore). • The Trustee of the Sub-Fund is HSBC Institutional Trust Services (Singapore) Limited and the Custodian of the Sub-Fund is The Hongkong and Shanghai Banking Corporation Limited. 	<p>Refer to “Management”, “The Trustee and the Custodian” and “Other Parties” sections in Paragraphs 2, 3 and 4 of the Prospectus for further information on the role and responsibilities of these entities and what happens if they become insolvent.</p>
KEY RISKS	
<p>WHAT ARE THE KEY RISKS OF THIS INVESTMENT?</p> <p>Investment in the Sub-Fund is designed to produce returns over the long term and is not suitable for short term speculation.</p> <p>The value of the Sub-Fund and its dividends or coupons (if any) may rise or fall. These risk factors may cause you to lose some or all of your investment and your principal may be at risk.</p>	<p>Refer to Schedule 2 of the Prospectus for further information on risks of the product.</p>
Market and Credit Risks	
<ul style="list-style-type: none"> • You are exposed to market risk – Certain situations may have a negative effect on the price of shares within a particular market. These may include regulatory changes, political changes, economic changes, technological changes and changes in the social environment. • You are exposed to currency risk – The Sub-Fund and Underlying Sub-Fund may buy shares in various currencies. The value of shares held by the Sub-Fund and Underlying Sub-Fund may be impacted due to changes in the exchange rates. 	
Liquidity Risks	
<ul style="list-style-type: none"> • The Sub-Fund is not listed and you can redeem only on Dealing Days. • You may not be able to redeem on a Dealing Day if a redemption limit is imposed – There may be a 10 per cent limit on the number of units that can be redeemed on any Dealing Day. • You are exposed to the liquidity risk of the Sub-Fund and its Underlying Sub-Fund’s investments – The Sub-Fund and its Underlying Sub-Fund may not be able to sell their assets in a timely manner and/or at a reasonable price. If this is the case, you may not be able to get your money back when you want it. 	
Product-Specific Risks	
<ul style="list-style-type: none"> • You are exposed to investment risk – Investment in the Sub-Fund involves risk and you may not get back the full amount you invested. Past performance is no guarantee of future performance. • You are exposed to emerging market risk – Investing in shares in emerging markets may involve a greater risk than investing in shares in developed markets. • You are exposed to real estate fund risk and property securities risk – Although the Sub-Fund and its Underlying Sub-Fund will not invest in real property directly, the Sub-Fund and its Underlying Sub-Fund may be subject to risks similar to those associated with the direct ownership of real property. Investing in real estate related assets and securities (like REITS) may expose the Sub-Fund and its Underlying Sub-Fund to additional risks like securities markets risks and accordingly, the value of these investments may fluctuate more than actual property. • You are exposed to single sector risk – The value of the Sub-Fund may be more volatile than a fund having a more diversified portfolio of investments. 	

- **You may be exposed to risks of distributions out of capital** – To the extent possible, distributions will be made from dividends received and capital gains realised for the Sub-Fund. However, if there is a deficit, the Manager may (although it is not the Manager’s current intention to do so) sell investments of the Sub-Fund to fund distributions which will erode the capital of the Sub-Fund and reduce the net asset value of its units.
- **You are exposed to small capitalisation/mid-capitalisation companies risk** – Securities in small-capitalisation/mid-capitalisation companies may have lower liquidity and their prices are more volatile to adverse economic developments than those of larger capitalisation companies in general.
- **You are exposed to charges against capital risk** – Fees and expenses are charged against the capital of the Sub-Fund (or its Underlying Sub-Fund). Deducting expenses from capital reduces the potential for capital growth and on any redemption. Unitholders may not receive back the full amount invested.
- **You are exposed to industry or sector risk** – The value of the Sub-Fund may be more volatile than a fund having a more diversified portfolio of investments covering different economic sectors. As a result, the value of the Sub-Fund may be subject to adverse and sudden changes.
- **You are also exposed to concentration risk.**
- **The Underlying Sub-Fund will be subject to risks associated with its investment into other collective investment schemes.**
